This book focuses on the National College Entrance Exam (NCEE), an important measurement of education quality in China, from both education economics and education policy perspectives. It provides a better understanding and stimulates more sophisticated evaluations of NCEE-related policies in China from the perspectives of education equity, the effectiveness of education input, and education quality. This book reports inspiring findings based on high-quality individual level data, innovative measurement design, and various appropriate identification strategies. The most important conclusion is that both education equity and quality can be achieved using well-designed policies based on solid empirical evidence. In the half century after 1945, South Korea went from an impoverished, largely rural nation ruled by a succession of authoritarian regimes to a prosperous, democratic industrial society. No less impressive was the country's transformation from a nation where a majority of the population had no formal education to one with some of the world's highest rates of literacy, high school graduates, and university students. Drawing on their premodern and colonial heritages as well as American education concepts, South Koreans have been largely successful in creating a schooling system that is comprehensive, uniform in standard, and universal. The key to understanding this educational transformation is South Korean society's striking, nearly universal preoccupation with schooling--what Koreans themselves call their "education fever." This volume explains how Koreans' concern for achieving as much formal education as possible appeared immediately before 1945 and quickly embraced every sector of society. Through interviews with teachers, officials, parents, and students and an examination of a wide range of written materials in both Korean and English, Michael Seth explores the reasons for this social demand for education and how it has shaped nearly every aspect of South Korean society. He also looks at the many problems of the Korean educational system: the focus on entrance examinations, which has tended to reduce education to test preparation; the overheated competition to enter prestige schools; the enormous financial burden placed on families for costly private tutoring; the inflexibility created by an emphasis on uniformity of standards; and the misuse of education by successive governments for political purposes.
