[Handbook of Research on Digital Learning](#) May 31 2020 Education has gone through numerous radical changes as the digital era has transformed the way we as humans communicate, inform ourselves, purchase goods, and perform other mundane chores at home and at work. New and emerging pedagogies have enabled rapid advancements, perhaps too rapidly. It's a challenge for instructors and researchers alike to remain up to date with educational developments and unlock the full potential that technology could have on this significant profession. The Handbook of Research on Digital Learning is an essential reference source that explores the different challenges and opportunities that the new and transformative pedagogies have enabled. The challenges will be portrayed through a number of case studies where learners have struggled, managed, and adapted digital technologies in their effort to progress educational goals. Opportunities are revealed and displayed in the form of new methodologies, institutions scenarios, and ongoing research that seeks to optimize the use of such a medium to assist the digital learner in the future of networked education. Featuring research on topics such as mobile learning, self-directed learning, and cultural considerations, this book is ideally designed for teachers, principals, higher education faculty, deans, curriculum developers, instructional designers, educational software developers, IT specialists, students, researchers, and academicians.

[The Legacy of the Italian Resistance](#) Jul 13 2021 This book adds to this growing body of scholarship on the Italian Resistance by analysing, for the first time, how the 'three wars' are represented over the broad spectrum of Resistance culture from 1945 to the present day. Furthermore, it makes this contribution to scholarship by bridging the gap between historical and cultural analysis. Whereas historians frequently use literary texts in their writings, they are often flawed by an insufficiently nuanced understanding of what a literary text is. Likewise, literary critics who have discussed writers such as Calvino and Vittorini, or films such as Paisà and La notte di San Lorenzo, only refer in passing to the historical context in which these works were produced. By fusing historical and cultural analysis, author Philip Cooke makes a unique contribution to our understanding of a key period of Italian history and culture.

[Tintenfass und Teleskop](#) Sep 22 2019 Die Figur Galileo Galilei ist für die europäische Wissenschaftsgeschichte, für die Kulturwissenschaften und für eine wissenschaftlich orientierte Literatur- und Kunstwissenschaft von großem Interesse. In diesem Band werden die Überschneidungen, Wechselwirkungen und Transferprozesse zwischen den wissenschaftlichen und kulturellen Dimensionen untersucht, die für Galileis Profilierung als frühneuzeitlicher Wissenschaftler ebenso wichtig sind wie für die im weiteren Sinn kulturelle Wahrnehmung seiner Entdeckungen und seiner Schriften - vor allem in Literatur und Kunst. Der Band ist interdisziplinär konzipiert, um die fachlichen Einzelperspektiven von Literatur-, Kunst- und Kulturwissenschaftlern sowie Wissenschaftshistorikern zusammenzuführen. Analysiert werden Formen und Funktionen der Produktion, Konzeptualisierung und Repräsentation von Wissen sowie Aspekte der Diskussion und Diffusion von Galileis Wissensansprüchen im Kontext der Frühen Neuzeit. Mit dieser Fokussierung auf die im Schnittbereich verschiedener kultureller Formationen angesiedelte Etablierung Galileis liefert der Band somit einen Beitrag zur interdisziplinären Erforschung von Galileis Rolle und Rezeption in der europäischen Kultur- und Wissenschaftsgeschichte des 17. Jahrhunderts.

Il sentiero delle cinque pietre Apr 22 2022 Una baby boomer italoamericana, combattuta tra i rigori del protestantesimo e l'indulgenza del cattolicesimo, racconta uno scorcio d'America e d'Italia dal dopoguerra fino a oggi. È nell'area della Baia di San Francisco, nella Silicon Valley del business frenetico, che inizia il suo viaggio guidato dalle cinque pietre, che la mano di Dio le mostra in sogno. La sua singolare carriera professionale si intreccia alla ricerca spirituale: dalla Apple computer a un campo-scuola buddista, dai bambini malati terminali all'orientamento pastorale in un carcere femminile federale. La prova più importante arriva con la diagnosi di tumore. Dopo la guarigione, si è ritirata in un borgo italiano. An Italian-American baby boomer, raised with the rigors of evangelical Protestantism, relates of her experiences in the United States and Italy from the 1960's up to current times. Her search for meaning led her to the mecca of her generation: California. Here she was awakened to her spiritual life guided by five stones that God had shown her in a dream. While pursuing her career at Apple computer, she attended workshops at a Zen Buddhist School in New Mexico. She was able to care for terminally ill children and work as a chaplain at a women's federal prison. Her most important spiritual test came with the diagnosis of cancer. After healing, she retired in an Italian village. Susan Pohl è una consulente manageriale per Kaiser Permanente e Stanford University. Welterschaffung - Kunstvernichtung Mar 29 2020 Die Gegenwart ist ein Zeitalter der Bilder. Doch was wird aus einer Kultur, in der nur noch wenige Bilder mit der Hand gemacht werden, in der nicht mehr gezeichnet und gemalt wird, in der sich kaum jemand noch als Bildhauer betätigt? Und wie ändert sich die individuellen Vorstellungskraft, wenn alles sichtbar gemacht, alles gezeigt wird und nichts mehr verborgen ist? Das Buch entwirft eine bildkulturwissenschaftliche Perspektive auf die Frage nach den wechselseitigen Abhängigkeiten von Bild und Kunst, die in unserer Gegenwart in eine "Verkunstung" der Welt münden. Untersucht wird die Einwirkung von Bildern der Kunst auf exemplarische Bildkulturen in einem Zeitraum vom Beginn des Kunstbegriffs im 14. Jahrhundert bis in die Gegenwart.

Glamorama Feb 20 2022 Stars und Models, hippe Charaktere, grenzenlose Gewalt und anarchischer Sex, Designerdrogen und hämmernde Musik – alles, was seine Fans (und Kritiker) erwartet haben, steckt in Bret Easton Ellis' spektakulärem Roman »Glamorama«. Ein Horrortrip durch das glamouröse New York, durch die obszön glitzernde Welt von London und Paris. Victor Ward, Model und Nightlife-Profi, lebt in der modebesessenen und prominenzgeilen Welt Manhattans. Er eröffnet einen eigenen Szene-Club. Er hat ein Supermodel als Freundin und betrügt sie. Wie alle im Schatten der Stars kämpft er um Geld, Macht und Ruhm. Und zunehmend gerät er in den Sog der düsteren Seite dieser Hochglanz-Welt, die eng vernetzt ist mit Verbrechen und Gewalt. Ein mysteriöser Auftrag führt ihn nach London und Paris, wo er Kontakt zu einer terroristischen Vereinigung aufnimmt, die – angeführt von einem Model – Hotels in die Luft jagt und Flugzeuge sprengt. Ob in Manhattan oder in Europa, Victor weiß, dass er in der Falle sitzt, und Fluchtwege gibt es nicht.

Information Technology in Health Science Education Sep 03 2020 This first volume is but an introduction to the growing use of computer-based systems in health-science education. It is unlikely that the intellectual or applied system constructs herein are either exhaustive of the field or immutable; growth is inevitable. For one thing, the field is still fractured and loosely organized, which is an inevitable description of an adolescent science in a rich mine of ideas. There is emerging, however, an organizing concept. A short look into the future indicates that educational system design will be dominated by a concept which, for want of a better term, we may call an "information system." Actually, this term derives from an early New York World's Fair exhibition designed by Charles Eames entitled the "Informational Machine," in which the designer illustrated once again his insight into the future by showing how in a fundamental manner the digital computer promised to affect and to change our lives; and this change is by no means completed. Even during the publication of this volume, the basic sciences requisite to the development of an information machine have evolved significantly. The three intellectual areas to watch are developments in artificial intelligence, graphics and man/machine interaction, and basic component and computer system design.

Via Ferratas of the Italian Dolomites: Vol 2 Jan 07 2021 Guidebook to the via ferrata routes of the southern Italian Dolomites. This guide covers via ferrata routes in the major mountain ranges of Civetta, Schiara and Pala as well as those to the west in the Brenta. A significant addition (and, as far as we are aware, not previously published in any English language guidebook) is the inclusion of routes around the northern end of Lake Garda and the Piccole Dolomites north of Vicenza. Here the mountains are generally lower and you can enjoy ferrata climbing over a much extended season, with some routes accessible for most of the year. This is the second in a series of two guidebooks to the via ferratas of the Italian Dolomites. (Volume One covers the eastern, northern and central areas of the Dolomites, while Volume Two completes the picture, focusing on the southern, Brenta and Lake Garda areas.)

Globalizing the student rebellion in the long '68 Jun 12 2021 This volume brings us closer to the dynamics of the educational world, especially students, from a wide range of national and regional scenarios, with a special focus on Europe and Latin America. In this way, a plural panorama is shown, in which the stories centered on the usual protagonists of the 1968 processes are accompanied by other scenarios, often considered secondary, but which this volume inserts in a more general story that helps us understand how the processes of the 60s were not concrete or national, but got an absolute regional and global significance. We see a complex process of transnational demand that ranged from Eastern Europe, included in the Soviet bloc, to the very heart of the Western Hemisphere, with the United States as the main axis, passing through the politically varied Western Europe, submitted to the same processes and cultural influences. In this sense, to the works that deal with the United States and France, are added others focused on Italy, Spain and Brazil, as

priority focus areas, together with other European and Latin American landscapes: Great Britain, Portugal, Greece, Slovakia, Hungary, Chile, Uruguay and Mexico, without missing, in addition, the case of one of the most unique actors on the international scene: the State of Israel. With this volume, we want to continue advancing in the knowledge of the educational world of the second half of the 20th century. Great are the challenges of this world at the beginning of the 21st century and many of them were already evident in 1968. Others have materialized as a result of those events. To confront both of them, we must first identify and analyze them, as well as being aware of their magnitude. We hope that all this work can contribute to this aim.

Utopia and Dystopia in Postwar Italian Literature May 11 2021 This book is about the presence of utopian and dystopian elements in the Italian literary landscape. It focuses on four authors that are representatives of the various positions in the Italian cultural debate: Pasolini, Calvino, Sanguineti, and Volponi. What did concepts like utopia and dystopia mean for these authors? Is it possible to separate utopia from dystopia? What is the role of science fiction in this debate? This book answers these questions, proposing an original interpretation of utopia and of the social role of literature. The book also takes into consideration four of the most influential literary journals in Italy: *Officina*, *il menabò*, *il verri*, and *Nuovi Argomenti*, that played a central role in the cultural and political debate on utopia in Italy.

Italian Neorealist Cinema Apr 10 2021 "The end of the Second World War saw the emergence in Italy of the neorealism movement, which produced a number of films characterized by stories set among the poor and working class, often shot on location using non-professional actors. In this study Christopher Wagstaff provides an in-depth analysis of neorealist film, focusing on three films that have had a major impact on filmmakers and audiences around the world: Roberto Rossellini's *Roma città aperta* and *Paisà* and Vittorio De Sica's *Ladri di biciclette*. Indeed, these films are still, more than half a century after they were made, among the most highly regarded works in the history of cinema. In this insightful and carefully researched work, Wagstaff suggests that the importance of these films is largely due to the aesthetic and rhetorical qualities of their assembled sounds and images rather than, as commonly thought, their particular representations of historical reality. The author begins by situating neorealist cinema in its historical, industrial, commercial, and cultural context. He goes on to provide a theoretical discussion of realism and the merits of neorealist films, individually and collectively, as aesthetic artefacts. He follows with a detailed analysis of the three films, focusing on technical and production aspects as well as on the significance of the films as cinematic works of art. While providing a wealth of information and analysis previously unavailable to an English-speaking audience, *Italian Neorealist Cinema* offers a radically new perspective on neorealist cinema and the Italian art cinema that followed it."
