*Mao: The Unknown Story* Jun 23 2022 The most authoritative life of Mao ever written, by the bestselling author of Wild Swans, Jung Chang and her husband, historian Jon Halliday. Based on a decade of research, and on interviews with many of Mao's close circle in China who have never talked before, and with virtually everyone outside China who had significant dealings with him, this is the most authoritative life of Mao ever written. It is full of startling revelations, exploding the myth of the Long March, and showing a completely unknown Mao: he was not driven by idealism or ideology; his intimate and intricate relationship with Stalin went back to the 1920s, ultimately bringing him to power; he welcomed Japanese occupation of much of China; and he schemed, poisoned and blackmailed to get his way. After Mao conquered China in 1949, his secret goal was to dominate the world. In chasing this dream he caused the deaths of 38 million people in the greatest famine in history. In all, well over 70 million Chinese perished under Mao's rule, in peacetime. Combining meticulous history with the story-telling style of Wild

Swans, this biography makes immediate Mao's roller-coaster life, as he intrigued and fought every step of the way to force through his unpopular decisions. Mao's character and the enormity of his behaviour towards his wives, mistresses and children are unveiled for the first time. This is an entirely fresh look at Mao in both content and approach. It will astonish historians and the general reader alike. 'This a bombshell of a book', Chris Patten, The Times 'The first great political biography of the twenty-first century' Spectator

*We Have No Idea* Oct 27 2022 'This witty book reveals the humbling vastness of our ignorance about the universe, along with charming insights into what we actually do understand' Carlo Rovelli, author of *Seven Brief Lessons on Physics* and *Reality Is Not What It Seems* In our small corner of the universe, we know how some matter behaves most of the time and what even less of it looks like, and we have some good guesses about where it all came from. But we really have no clue what's going on. In fact, we don't know what about 95% of the universe is made of. So what happens when a cartoonist and a physicist walk into this strange, mostly

unknown universe? Jorge Cham and Daniel Whiteson gleefully explore the biggest unknowns, why these things are still mysteries, and what a lot of smart people are doing to figure out the answers (or at least ask the right questions). While they're at it, they helpfully demystify many complicated things we do know about, from quarks and neutrinos to gravitational waves and exploding black holes. With equal doses of humour and delight, they invite us to see the universe as a vast expanse of mostly uncharted territory that's still ours to explore. This is a book for fans of Brian Cox and *What If*. This highly entertaining highly illustrated book is perfect for anyone who's curious about all the great mysteries physicists are going to solve next.

### **The Unknown Kimi**

**Raikkonen** Aug 21 2019 Kimi Räikkönen is the Finnish superstar Formula One driver with a reputation for being fast on the track and silent off it - until now! In this superb and authorised portrait of Räikkönen, Kari Hotakainen gets to reveal the side of the man that few beyond his close family and friends have ever seen. Enigmatic and private, Ferrari's former world champion driver rarely opens up to outsiders, but he granted Hotakainen exclusive access to his world and to his way of thinking. It ensures that this will be a book that will delight all fans of motorsport, who have long revered the Finn. Including never-previously-seen photographs from his own collection, *The Unknown Kimi*

Räikkönen takes the reader into the heart of the action at grands prix around the world, behind the scenes as race strategies are planned, and opens up the private side of his life that he normally guards so carefully. With all the cult appeal of *I Am Zlatan Ibrahimovic*, the raw excitement of Formula One and the insight of the best biographies, this is a book every sports fan will want to treasure.

**The Tale of the Unknown**

**Island** Nov 23 2019 A dreamer petitions his king for a boat—and gets more than he bargained for—in “this richly

enigmatic short story" by the Nobel Prize-winning author (Kirkus). "A man went to knock at the king's door and said, Give me a boat. The king's house had many other doors, but this was the door for petitions. But the king spent all his time sitting at the door for favors (favors being offered to the king, you understand), whenever he heard someone knocking at the door for petitions, he would pretend not to hear . . ." So begins this beautifully illustrated and deceptively simple fable. Why the petitioner required a boat, where he was bound for, and who volunteered to crew for him, the reader will soon discover. In a departure from his linguistically dense and sprawling historical novels, Jose Saramago presents a philosophic love story worthy of Swift or Voltaire.

### **The Moth Presents All These Wonders** Feb 25 2020

"Wonderful." —Michiko Kakutani, New York Times Celebrating the 20th anniversary of storytelling phenomenon The Moth, 45 unforgettable true stories about risk, courage, and facing the unknown, drawn from the best ever told on their stages Carefully selected by the creative minds at The Moth, and adapted to the page to preserve the raw energy of live storytelling, All These Wonders features voices both familiar and new. Alongside Meg Wolitzer, John Turturro, Tig Notaro, and Hasan Minhaj, readers will encounter: an astronomer gazing at the surface of Pluto for the first time, an Afghan refugee

learning how much her father sacrificed to save their family, a hip-hop star coming to terms with being a "one-hit wonder," a young female spy risking everything as part of Churchill's "secret army" during World War II, and more. High-school student and neuroscientist alike, the storytellers share their ventures into uncharted territory—and how their lives were changed indelibly by what they discovered there. With passion, and humor, they encourage us all to be more open, vulnerable, and alive.

Connected to the Unknown - mit Systemaufstellungen die digitale Transformation meistern Dec 29 2022 Die digitale Transformation eröffnet einen Raum völlig neuer technischer und wirtschaftlicher Möglichkeiten. Zugleich entzieht sie etablierten Strukturen den Boden. Was brauchen Unternehmen und Einzelne, um diese Herausforderung anzunehmen und sich auf das Unbekannte einzulassen? Offenheit und die Bereitschaft, Gewohntes aufzugeben und unbegangene Wege zu gehen. Das verunsichert viele, denn wir Menschen brauchen anders als Roboter ein Gefühl von Sicherheit und Verbundenheit. Wie kann Digitalisierung mit menschlichem Maß gelingen? Was hilft, wenn es hakt? Mit der Systemaufstellung können im Spannungsfeld zwischen digitaler Logik und menschlicher Psycho-Logik verborgene Hindernisse ans Licht kommen. Systemische

Dynamiken werden so hautnah erfahren. Wie Aufstellungsarbeit in Unternehmenszusammenhängen helfen kann, die Digitalisierung zu meistern, zeigt Klaus P. Horn mit einer psychologischen Betrachtung digitaler Blindspots, praktischer Anwendung systemischer Prinzipien, ausführlichen Fallstudien und einem Kapitel mit Fragen und Antworten zur Systemaufstellung im Digitalisierungskontext. The Unknown Reality, Volume Two Oct 15 2021 From the Bestselling Author of Seth Speaks In this second volume of The "Unknown" Reality, Seth radically expands our conceptions of "self," by showing us that the human personality is literally infinite in its scope and potential. He discloses precisely how probable realities combine to create our waking lives, and how our "higher selves" make decisions regarding our everyday existence. In a far-reaching exploration of the dynamics of desire and free will, he asserts that each atom, molecule, and cell has its own consciousness and powers of choice. With humor and simple analogies, Seth leads us beyond our ordinary level of awareness into a spectacular discovery of the multidimensional nature of the self, including: • "Consciousness units" as the basis of our universe • The relevance of extrasensory perception in understanding our world • The worlds we visit in dreams and out-of-body states • Dreaming as a science

to create present and future realities • “Families of consciousness” we choose to belong to • Practical methods for exploring your own “unknown” reality “There is an “unknown” reality. I am part of it, and so are you . . . Each individual is a part of the unknown reality . . . To explore the unknown reality you must venture within your own psyche, travel inward through invisible roads as you journey outward on physical ones . . . I hope that [in this book] the reader can see the greater dimensions that touch ordinary living, and sense the psyche’s greater magic.” — Jane Roberts, *Speaking for Seth*

*The Oxford Handbook of the Archaeology of Death and Burial* Sep 21 2019 The Oxford Handbook of the Archaeology of Death and Burial reviews the current state of mortuary archaeology and its practice, highlighting its often contentious place in the modern socio-politics of archaeology. It contains forty-four chapters which focus on the history of the discipline and its current scientific techniques and methods. Written by leading, international scholars in the field, it derives its examples and case studies from a wide range of time periods, such as the middle palaeolithic to the twentieth century, and geographical areas which include Europe, North and South America, Africa, and Asia. Combining up-to-date knowledge of relevant archaeological research with

critical assessments of the theme and an evaluation of future research trajectories, it draws attention to the social, symbolic, and theoretical aspects of interpreting mortuary archaeology. The volume is well-illustrated with maps, plans, photographs, and illustrations and is ideally suited for students and researchers.

Ethiopia, the Unknown Land

Sep 14 2021 Ethiopia, legendary home of the Queen of Sheba who travelled to Jerusalem to meet Solomon, resting-place of the Ark of the Covenant and battleground of the great emperors from Ezana in the 4th century AD to Haile Selassie in modern times, has inspired many travellers and writers since time immemorial. Recently few have journeyed there or, indeed, have any conception of the extraordinary cultural treasures that await visitors. Stuart Munro-Hay knows Ethiopia intimately, having lived and researched there over many years. He has produced the first truly comprehensive guide to the monuments of this beautiful, culture-steeped country, as well as offering a literary companion. Here is a guide to Ethiopia’s architecture, geography, peoples, art and history, embracing all the major sites of the land over the ages. It will become the classic reference guide.

The Unknown Errors of Our

Lives May 30 2020 In nine poignant stories spiked with humor and intelligence, Chitra Banerjee Divakaruni captures lives at crossroad moments—caught between past and present, home and abroad, tradition and fresh experience. A widow in California, recently arrived from India, struggles to adapt to a world in which neighbors are strangers and her domestic skills are deemed superfluous in the award-winning “Mrs. Dutta Writes a Letter.” In “The Intelligence of Wild Things,” a woman from Sacramento visits her brother in Vermont to inform him that back in Calcutta their mother is dying. And in the title story, a painter looks to ancient myth and the example of her grandmother for help in navigating her first real crisis of faith. Knowing, compassionate and expertly rendered, the stories in *The Unknown Errors of Our Lives* depict the eternal struggle to find a balance between the pull of home and the allure of change.

The Lost Book of Adventure Jul 24 2022

A facsimile edition of the tattered notebooks of the Unknown Adventurer, this love letter to the wild details everything you need to know about how to live and thrive in nature, from the principles of treehouse building to

wilderness first aid. If you are reading this, it means my notebooks have been found. I am leaving them here at camp for safekeeping along with a few other belongings that I won't be taking with me. The notebooks are a lifetime's worth of knowledge, which I'm passing on to you. So reads an excerpt from the weatherworn letter discovered by nature enthusiast Teddy Keen on a recent trip to the Amazon, along with sketchbooks filled with details of extraordinary adventures and escapades, expedition advice, and survival methods, annotated with captivating colored-pencil drawings. It is thought that the sketchbooks were created for two young relatives of the author. Drawing on Teddy's knowledge of the outdoors, the pages of the sketchbooks have been carefully transcribed for young readers, as they were originally intended. You'll be transported by riveting adventure tales from around the globe, like being dragged off by a hyena in Botswana, surviving a Saharan dust storm, being woken by an intrepid emperor penguin in Antarctica, and coming face-to-face with a venomous bushmaster (one of the most dangerous snakes on the planet)—all told in lyrical prose and illustrations that wonder at the mysterious beauty of the wild. Having inspired the adventurous spirit in you, the *Unknown Adventurer* encourages you to set out on your own adventure with information on wild camping, rafting, exploration, and shelters and dens, plus tips on

first aid and tying knots. Expert instructions on wilderness basics, like building a fire, what to do if you get lost, and how to build various types of shelters are accompanied by more specific skills culled from many years of experience, like baking campfire bread, creating a toothbrush from a twig, making a suture from soldier ants, and even how to pan for gold. Find your way back to your primal self with the immersive text and glorious color artwork of this one-of-a-kind adventure book. REMEMBER: be good, be adventurous...and look after your parents.

*The Unknown World of the Mobile Home* Mar 20 2022 In American popular imagination, the mobile home evokes images of cramped interiors, cheap materials, and occupants too poor or unsavory to live anywhere else. Since the 1940s and '50s, however, mobile home manufacturers have improved standards of construction and now present them as an affordable alternative to conventional site-built homes. Today one of every fourteen Americans lives in a mobile home. In *The Unknown World of the Mobile Home* authors John Fraser Hart, Michelle J. Rhodes, and John T. Morgan illuminate the history and culture of these often misunderstood domiciles. They describe early mobile homes, which were trailers designed to be pulled behind automobiles and which were more often than not poorly constructed and unequal to the needs of those who used them. During the 1970s, however, Congress enacted federal standards for

the quality and safety of mobile homes, which led to innovation in design and the production of much more attractive and durable models. These models now comply with local building codes and many are designed to look like conventional houses. As a result, one out of every five new single-family housing units purchased in the United States is a mobile home, sited everywhere from the conventional trailer park to custom-designed "estates" aimed at young couples and retirees. Despite all these changes in manufacture and design, even the most immobile mobile homes are still sold, financed, regulated, and taxed as vehicles. With a wealth of detail and illustrations, *The Unknown World of the Mobile Home* provides readers with an in-depth look into this variation on the American dream. -- Karl Raitz, University of Kentucky, author of *The National Road* *The Book of the Unknown* Sep 26 2022 Marvelous and mystical stories of the thirty-six anonymous saints whose decency sustains the world—reimagined from Jewish folklore. A liar, a cheat, a degenerate, and a whore. These are the last people one might expect to be virtuous. But a legendary Kabbalist has discovered the truth: they are just some of the thirty-six hidden ones, the righteous individuals who ultimately make the world a better place. In these captivating stories, we meet twelve of the secret benefactors, including a timekeeper's son who shows a sleepless village the beauty of dreams; a gambler who teaches

a king ruled by the tyranny of the past to roll the dice; a thief who realizes that his job is to keep his fellow townsfolk honest; and a golem—a woman made of mud—who teaches kings and peasants the real nature of humanity. With boundless imagination and a delightful sense of humor, acclaimed writer and artist Jonathon Keats has turned the traditional folktale on its head, creating heroes from the unlikeliest of characters, and enchanting readers with these stunningly original fables.

#### Statistics for Mining

Engineering Oct 03 2020 Many areas of mining engineering gather and use statistical information, provided by observing the actual operation of equipment, their systems, the development of mining works, surface subsidence that accompanies underground mining, displacement of rocks surrounding surface pits and underground drives and longwalls, amongst others. In addition, the actual modern machines used in surface mining are equipped with diagnostic systems that automatically trace all important machine parameters and send this information to the main producer's computer. Such data not only provide information on the technical properties of the machine but they also have a statistical character. Furthermore, all information gathered during stand and lab investigations where parts, assemblies and whole devices are tested in order to prove their usefulness, have a stochastic character. All of these materials need to be

developed statistically and, more importantly, based on these results mining engineers must make decisions whether to undertake actions, connected with the further operation of the machines, the further development of the works, etc. For these reasons, knowledge of modern statistics is necessary for mining engineers; not only as to how statistical analysis of data should be conducted and statistical synthesis should be done, but also as to understanding the results obtained and how to use them to make appropriate decisions in relation to the mining operation. This book on statistical analysis and synthesis starts with a short repetition of probability theory and also includes a special section on statistical prediction. The text is illustrated with many examples taken from mining practice; moreover the tables required to conduct statistical inference are included.

**At the Table of the Unknown** Feb 19 2022 At the Table of the Unknown confirms that the possibility for poetry is everywhere. These poems are clear, open-eyed, and harvested from two decades of writing about everything from the echoing feeling of loss to the gritty strangeness of parenthood. Here, language is harnessed, sometimes by

formal elements, and sometimes by its own energy, to explore what it means to be alive today.

#### **Path of the Novice Mystic**

Mar 08 2021 Path of the Novice Mystic provides a unique look into the world of secular mysticism. Dr. Paul Dunion suggests that peace comes when we accept the world's inherent uncertainties and begin to approach life with elevated curiosity and enthusiasm. Dunion guides you toward maintaining a heightened level of mindfulness in everyday life. He shows how the simple act of being fully present and cultivating a soul practice opens the gates to unity—the essence of the novice secular mystic and the key to finding depth and meaning in life. While his instruction is clear, Dunion does not suggest a cure-all formula. Rather, he encourages honest self-examination and arms you with thoughtful questions that will incite true personal reflection, thereby allowing you to develop a personal philosophy. With this unique blend of psychology, philosophy, and spirituality, Path of the Novice Mystic is sure to open the heart and mind to a more enriching way of life.

**The Unknown Sayings of Jesus** Aug 25 2022 Hundreds of sayings were attributed to the sage from Nazareth by ancient admirers. More than fifteen hundred versions of five hundred quotations are attributed to Jesus in the New Testament, the Gospel of Thomas, and other Gospels found at Nag Hammadi. Marvin

Meyer has combed additional Jewish, Muslim, and Christian sources for another 200 of the most fascinating epigrams and parables ascribed to Jesus. Dr. Meyer includes an intriguing introduction and annotations that put the sayings into perspective.

*The HM Learning and Study Skills Program* Aug 01 2020  
The hm Learning and Study Skills Program: Level II was designed to provide an introduction to learning and study skills for 8th, 9th, and 10th grade students through a series of activity-oriented units. It is structured on the assumption that an activity-oriented lesson is the most effective instructional strategy for the teaching of study skills: more succinctly, that "learning by doing" is the best way 'study smart'. The Level II Teacher's Guide includes a pretest, a wide variety of teaching suggestions, unit summaries, activities for retrieval and closure as well as teaching adaptations through the use of technology. It was published to help teachers assist students in

the development of essential study skills and to reinforce their existing strategies that work. The Program supports academic independence for students that have a wide range of ability with college and career readiness as a tangible and realistic goal.  
*Femme Fatale* Dec 05 2020  
In 1917, the notorious Oriental dancer Mata Hari was arrested on the charge of espionage; less than one year later, she was tried and executed, charged with the deaths of at least 50,000 gallant French soldiers. The mistress of many senior Allied officers and government officials, even the French minister of war, she had a sharp intellect and a golden tongue fluent in several languages; she also traveled widely throughout war-torn Europe, with seeming disregard for the political and strategic alliances and borders. But was she actually a spy? In this persuasive new biography, Pat Shipman explores the life and times of the mythic and deeply misunderstood dark-eyed siren to find the truth.
