*Lenos lives his peaceful life in the Eden-like world of a little planet called Holon. One day an urgent request for help arrives from a remote corner of the Galaxy; planet Earth. Lenos makes the decision to leave his heavenly life and embark upon a daring journey to assist planet Earth, which has become trapped in a cosmic anomaly. Throughout his varied incarnations on Earth, spread out over time and history, Lenos must come to understand and complete his galactic mission. His struggles, romances and adventures on Earth will culminate in an event that will affect the destiny of the entire Universe It's the master tactician of the ruthless Galactic Empire versus the Free Planets Alliance in Japan's greatest space opera epic! In the thirty-sixth century, humanity has conquered the galaxy and colonized countless star systems. The Galactic Empire, modeled along Prussian lines, and the democratic Free Planets Alliance are at war, and the fate of every human being in the universe hangs in the balance. This classic Japanese space opera, adapted into a legendary anime, is finally available in English for the first time. A grand scheme for retaking Iserlohn is delivered to Reinhard, who with renewed determination seeks to become ruler of the galaxy and to fulfill the oath he made with a dear, departed friend. But what are the aims of Phezzan, the third force at work behind the scenes? Meanwhile, no sooner is Yang breathing a sigh of relief when Julian returns from his first combat mission than he is summoned to an inquest and departs for the capital of the alliance. As if waiting for this opportunity to strike, however, the imperial military's secret weapon appears right at the gates of Iserlohn. The battle begins! Who will endure? Meet Your Galactic Neighbors is the story of three children from around the world that are tasked to reestablish the energetic vibration of Planet Earth. A group of higher dimensional consciousness beings, named the Galactic Council of Twelve that are watching over this sector of universes, have realized that planet earth's galactic cyclical movements are leading the solar system into a galactic*

space that vibrates at a higher frequency, causing many negative intentioned beings to be potentially exterminated in result of their disharmonic vibration. The Galactic Council of Twelve sees that the possibility of souls from many different dimensions becoming lost, is imminent. The three children's mission is to connect 13 Aquarian Triangles to re-structure the harmonic signature of the planet, enabling Earth, and the beings that call her home, to vibrate at a higher frequency, promoting an easier transition into the next level of consciousness. To accomplish their mission, the three children have the support of the Galactic Council of Twelve; of their mentor, Francis Bacon, a disembodied spirit from the 1600's, expert in politics, alchemy and socialite manners; and of different groups of shamans, monks and local people from the 13 special locations; having also the support of most of the non-human beings inhabiting Planet Earth. Through their mission, the children are introduced to several aspects of the Secret Space Program Alliance, they are shown a galactic level overview of the current vibrational health of the planet and all its inhabitation, and learn, through experience, that the way they decide to express their emotional intention affects both the physical body and its surrounding area. Some of the components of these energetic fields are known as chi and chakras. This concept is brought to us by, not only by the Tai Chi philosophy and practice, but also by Dr. Masaru Emoto, when proving we can change the molecular organization of water by either intention or sound alone. While searching for the truth about the environment in which we as beings are contained, the author was introduced to the idea of a planetary chakra system and in consequence, has personally measured many of the 13 locations to verify this theory. The children visit each of these 13 planetary chakras to start a full moon meditative celebration to emanate an Electrical Magnetic Flux Density (EMFD) in the form of an Aquarian Triangle, to then connect them as one energetic planetary harmonic set of gears. The last task of the mission is to communicate these changes in vibration to beings both within and without the planet, introducing the children to the world's government's lists of Aliens. Throughout this journey the children learn that they are the micro of the macro, they learn about balancing their energetic bodies, about ancient stories of the forces of duality and about the possibilities of a harmonic future to us all, if we strive for that choice. In AD 3150 on Zerian, the home world of the Intergalactic Riders, the past has come back to haunt the peoples of the galaxy. A chain of events is about to unleash an ancient and powerful evil. Every living being in the galaxy faces the very real threat of annihilation unless a young guardian named Altar can find a way to get a message across the time barrier. Can an action of the present truly impact history? As Altar travels ahead of a team of extraordinary heroes to locate the signal that is resonating from the Trimex galaxy, he finds his capsule being pulled into a temporal superstorm that bridges the gap to another galaxy from the past called the Milky Way. Altar is transported back in time to man's earliest beginnings, where his directives and mission becomes entangled. There, the guardian must piece together all the clues and make a choice, as time becomes his greatest enemy. Will Altar decipher the diabolical scheme in time to stop a tyrant's revenge, or will the fate of the past and future galaxies be decided by an ancient and terrifying evil with access to powers beyond his comprehension? Altar and the Intergalactic Riders must race against time to save the galaxy from annihilation. If Zerian falls from the heavens, could Earth be next? The twentieth century elevated our understanding of the Universe from its early stages to what it is today and what is to become of it. Cosmology is the weapon that utilizes all the scientific tools that we have created to feel less lost in the immensity of our Universe. The standard model is the

theory that explains the best what we observe. Even with all the successes that this theory had, two main questions are still to be answered: What is the nature of dark matter and dark energy? This book attempts to understand these questions while giving some of the most promising advances in modern cosmology. The 4 year journey of Celestine Star, founder of the "Galactic Earth Council" (GEC) and the GEC members. It reveals a major unfoldment for humanity in meeting in the high mountains of northern California where they experienced contact with our Ultraterrestrial ancestors, called the Star Kin. In this epic story, Celestine tells her life story of how she became a Extraterrestrial contactee at an early age, which prepared her to found and lead the GEC "Skywatch" ceremonial circles as a guide and ambassador to the High Spiritual Council and the Galactic Star Federation. The Galactic Earth Council book opens the doorway for all of humanity to know and understand there is a reintegration taking place on earth. The "Reintegration", as the Star Kin call it the process wherein humanity will once again become part of the greater galactic family of beings that exist throughout this solar system, our galaxy, and the cosmos. Come discover how a few staunch citizens of earth became some of the first to make contact with the Ultraterrestrials on a regular basis for 4 years and continue to have positive and enlightening relationships with their galactic Star Kin. List of members, 1890-1913, bound with v. 1-23. The distant future: In a universe where humanity's mortal enemy is the alien race known as Bugs, an Imperial battleship suffers a mysterious and devastating attack that sends Captain Alan Corinth crash landing onto an unknown planet. Much to his surprise, rather than the technologically advanced humanity he knows, the humans he encounters there seem to live in a fantasy world filled with swords and magic! Thus begins the first volume of this manga adaptation of Captain Corinth: The Galactic Navy Officer Becomes an Adventurer. This expansive saga of colliding worlds crashed like a falling star onto the scene of Japanese online novels, much like Captain Corinth himself falling from the sky! With detailed worldbuilding that brings out the best from both fantasy and sci-fi genres, this story spools out to depths unseen in recent years, expertly rendered into visual format by manga artist Tomomasa Takuma, known for manga adaptations of such similarly epic sagas as Record of Lodoss War and Code Geass. Four high school teenagers from Sussex High School are in each other's own world. They start out as despising one another until, one morning, they wake up with superpowers. They become unified as friends and companions because they have to fight the Zook Force, an alien force from outer space who wishes to destroy them and the planet. Watch these teenagers become unified as friends to take on a force that is stronger and bigger than they are. Surveys present knowledge of and research into the sun's galaxy, covering such aspects and components as observational data, neighboring stars, clusters, galactic motion, the nucleus, interstellar gas, nebulae, and galactic structure and change A brilliantly funny story of what happens when a galactic princess moves in next door and almost brings about the end of the world. Exciting new fiction from the bestselling, award-winning author of My Brother is a Superhero. Gavin's got a new neighbour and she's really annoying. Niki follows him everywhere, bosses him about, and doesn't care that her parents will obliterate Earth with their galactic warships if she doesn't stop running away from them. Can Niki and Gavin sort out the alien despots (aka Mum and Dad) and save the planet? Possibly. Will they become friends along the way? Doubtful... *Book Prize and the British Book Industry Awards Children's Book of the Year. Perfect for fans of David Baddiel and David Walliams. Read the My Brother is a Superhero series: My Brother Is a Superhero My Gym Teacher is an Alien Overlord My Evil Twin is a Supervillain My Arch-Enemy is a Brain in a Jar My Cousin is a Time-Traveller* Thirty years ago, a distant alien race, whose home planet was in danger because of their failing red dwarf star, tried to invade Earth and kill off all life using mind controlling, nanobots. They had visions of eventually coming to a lifeless Earth and begin terraforming the planet to suit their needs. Thanks to the unusual talents of Dorothy Keets, an inspired physicist, the world was spared from the almost unstoppable alien weapon, but the aliens were nothing if not persistent. Ten years following the first attack, they tried again, this time coming to Earth while ensconced in their nearly indestructible vessels, and using several alien techniques and different weapons - they nearly succeeded. The world's armies, after failing to so much as slow the second attack, called upon the same brilliant, slightly older, scientist, who helped stop the first attack. She, while devising a unique, devastating, weapon, was able to stop the attack. Behind her second victory, she was recognized as a worldwide hero, but her weapon "The Orb Weapon" was so unique - so overpowering - so maniacal, and possibly world ending, the President of the United States ordered it deactivated, and secured inside a vault deep inside the bowls of Area 51 where it would remain to never be used again - at least, that was the plan. The aliens, now repelled for the second time, were already making plans to return - and they did while bringing with them new weapons, but their attack, again, was thwarted. Dorothy's unconventional fearful weapon was uncrated, dusted off, and with a few modifications and enhancements, implemented to save the world once more. Not only were the desperate aliens repelled for the third time, but while retreating to their home world, accidentally left behind one of their own, who was quickly captured by the United States military and then sequestered in Area-51 to be studied. Dorothy was able to gain access to and establish a line of communication with the extremely intelligent alien, and while displaying sympathy for the creature, gave it a name, George. While sensing Dorothy's compassion, George became friends with her, and taught her the secret of deep space travel. He taught her how to construct stable wormholes, while unintentionally giving humankind the ability to strike back at his home world and the still antagonistic, aggressive, alien species. Norman Wells, the then President of the United States, now becoming exasperated behind the repeated alien attacks, and using the newly learned wormhole technology, sent a flotilla of orb weapon armed space fighters to the offending alien's planet while totally destroying it with only a few of the alien species able to escape the destruction to become orphans in the cosmos, and to never be able to attack Earth, again. The final defeat of the aliens being a global effort, all of humankind united in peace. President Wells, being a visionary, wasn't content with the victory over the aliens - he had grand plans for the use of the newly learned alien technology. While wanting the worldwide peace to continue, he proposed a plan to build a massive deep space exploration vessel, later dubbed, Messenger Two, and while enlisting the efforts of virtually every nation on Earth, his design to maintain global peace succeeded as the entire world came together to build the space going city. With the building of Messenger, humankind's dreams of becoming a galactic explorer were finally realized. Now having the ability to go anywhere they wished, it was decided to find another planet in the galaxy suitable for human colonization. In this, the final episode, that planet is discovered, and named Novus. Unfortunately, the much anticipated colonization of Novus fails, while setting into action events resulting in a truly

tragic ending. *A Thought Provoking, Heart Activating, Inspiring book that takes readers on a mystical journey to explore infinite love, cosmic creation, and the vast potential of the human experience. Galactic Herstory Vol I...Tales of a Warrior Born by the Light is a mythic tale of one soul's voyage of becoming...It is a tale of our collective family's journey through time across the ages... our fall, our rise and our becoming a truly humane star species. It is a tale of remembering our Ancient Roots and Galactic Heritage, remembering who we are and what we are made of and our ultimate return to Love. This is a book of poetry that reads like a narrative. It is timelessness in nature. It is separated into three sections: The Rise, The Fall, and The Becoming. The Fall is about surrender, initiation, awakening to life, confrontation of the shadow, and forgiveness. The Rise is about choices, initiating change, developing courage, and finding the will power to step forward. The Becoming is about the return home, alchemical marriage, embodiment, acceptance, and completion. This tale is about re-membering who we are and what we are made of. It's not easy and it's not always pretty but we persevere...Heroes of Night, Warriors of Light, we sound the way forward. We return one by one into the Collective Force of Source sharing tales of our travels and woes, healing through the ripples of time, becoming truly human, divinely crafted by the sign of faith. And so, this is a living story...it is our story. The Love Story of Creation...we sing it, dream it, feel it together. Dust is a ubiquitous feature of the cosmos, impinging directly or indirectly on most fields of modern astronomy and astrophysics. Dust in the Galactic Environment, Second Edition provides a thorough overview of the subject, covering general concepts, methods of investigation, important results and their significance, relevant literature, and some suggestions for promising avenues of future research. Since the publication of the first edition of this popular graduate text, major advances have been made in our understanding of astrophysical dust, especially in the light of exciting new results from space- and ground-based telescopes, together with advances in laboratory astrophysics and theoretical modeling. This new, expanded edition highlights the latest results and provides a context for future research opportunities. The first chapter provides a historical perspective for current research and an overview of interstellar environments and the role of dust in astrophysical processes, followed by a discussion of the cosmic history of the chemical elements expected to be present in dust and an examination of the effect of gas-dust interactions on gas phase abundances. The next several chapters describe the observed properties of interstellar grains, such as their extinction, polarization, absorption, and emission characteristics. Then, the book explores the origin and evolution of dust, tracing its life cycle in a succession of environments from circumstellar shells to diffuse interstellar clouds, molecular clouds, protostars, and protoplanetary disks. The final chapter summarizes progress toward a unified model. Dust in other galaxies is discussed as an integral part of the text rather than as a distinct topic requiring separate chapters. Containing extensive references and problems to aid understanding and illustrate basic principles, the book is ideally suited for graduate and advanced undergraduate courses. It will also be an invaluable reference for postgraduate students and researchers working in this important field. This book provides the first detailed and comprehensive examination of all the materials making up the Star Wars franchise relating to the portrayal and representation of real-world history and politics. Drawing on a variety of sources, including films, published interviews with directors and actors, novels, comics, and computer games, this volume explores the ways in which historical and contemporary events have been repurposed within Star Wars. It focuses on key themes such as*

*fascism and the Galactic Empire, the failures of democracy, the portrayal of warfare, the morality of the Jedi, and the representations of sex, gender, and race. Through these themes, this study highlights the impacts of the fall of the Soviet Union, the War on Terror, and the failures of the United Nations upon the 'galaxy far, far away'. By analysing and understanding these events and their portrayal within Star Wars, it shows how the most popular media franchise in existence aims to speak about wider contemporary events and issues. The History and Politics of Star Wars is useful for upper-level undergraduates, postgraduates, and scholars of a variety of disciplines such as transmedia studies, science fiction, cultural studies, and world history and politics in the twentieth and twenty-first centuries. This book is about spiritual awakening and transformation, and the ascension opportunities that will be available to each of us at the end of this evolutionary cycle in 2012. The Galactic Heritage Cards were first introduced in Japan, where hundreds of Lyssa's students have since used them with profound results. USING THE CARDS: The overall concept of the cards is to explore the journey from unity to fragmentation/polarity and back to reintegration. Since each of us is part of the same one consciousness, this is a holographic "journey" that unifies us all. The card system uses the holographic concept that we are experiencing both unity and separation simultaneously. The components of the cards explore this journey in a variety of ways, including: SPECIES or STAR SYSTEM: Twenty-one different species or star systems are represented in the four suits (or time streams) of cards to symbolize the main archetypal groups who have influenced the development of our galactic family. THEME: Each card has a theme or lesson that is connected to the civilization it depicts. Contemplative text and deeper commentary are presented for each card to help users understand how to apply this wisdom in their current lives. ARTWORK: The architect of these cards, the multidimensional consciousness Germane channeled through Lyssa, also assisted Hong Kong artist David Cow in the channeling of the images. Contemplating the artwork allows more information and energy to be transmitted that goes beyond the text for each card. The art works deeply with the subconscious and adds a powerful dimension to the user's inner work with the cards. In addition to the individual card art, an underlying image spans all the cards when they're laid out on a grid with 18 cards per row. This image represents our journey back to integration, and thus each card carries an embedded energy of unity even within the uniqueness and "separate journey" of each card. When the final card was channeled, the total number was 108 -- a sacred number in many traditions that reflects the idea of wholeness and completion. GETTING STARTED: In the accompanying booklet we offer more information, the text and commentary for each card, and several recommended spreads to help you get started. Joe Fernwright, a pot-healer or repairer of ceramics, not much in demand on Earth, attracts the interest of the Glimmung, an extraterrestrial being that may be divine In this timeless book, Galactic Soul History of the Universe presents 34 first-hand accounts of clients and their inspiring Soul Journeys throughout Creation. These remarkable past-life regression sessions were facilitated using the groundbreaking Angelic Universal Regression Alchemy (A.U.R.A.) Hypnosis Healing technique. Through A.U.R.A., we explore in-depth the experiences of our past, future and current lives meant for our highest healing under the guidance of our Higher Selves. Through these Higher Self aspects, we learn the enlightening truth of our Earth's History and our Universe. Activating memories within us that lay dormant to be awakened once more for our highest path of individual and collective Ascension. In these Soul Journeys, we will journey through soul remembrance of the Inverted A.I. Matrix,*

learning to weave through it so that we may graduate and begin operating instead in our organic timelines. Bridging forth the possibility of a fruitful Ascension into the Fifth Dimension or higher. Since it was first published in 1987, Galactic Dynamics has become the most widely used advanced textbook on the structure and dynamics of galaxies and one of the most cited references in astrophysics. Now, in this extensively revised and updated edition, James Binney and Scott Tremaine describe the dramatic recent advances in this subject, making Galactic Dynamics the most authoritative introduction to galactic astrophysics available to advanced undergraduate students, graduate students, and researchers. Every part of the book has been thoroughly overhauled, and many sections have been completely rewritten. Many new topics are covered, including N-body simulation methods, black holes in stellar systems, linear stability and response theory, and galaxy formation in the cosmological context. Binney and Tremaine, two of the world's leading astrophysicists, use the tools of theoretical physics to describe how galaxies and other stellar systems work, succinctly and lucidly explaining theoretical principles and their applications to observational phenomena. They provide readers with an understanding of stellar dynamics at the level needed to reach the frontiers of the subject. This new edition of the classic text is the definitive introduction to the field. ? A complete revision and update of one of the most cited references in astrophysics Provides a comprehensive description of the dynamical structure and evolution of galaxies and other stellar systems Serves as both a graduate textbook and a resource for researchers Includes 20 color illustrations, 205 figures, and more than 200 problems Covers the gravitational N-body problem, hierarchical galaxy formation, galaxy mergers, dark matter, spiral structure, numerical simulations, orbits and chaos, equilibrium and stability of stellar systems, evolution of binary stars and star clusters, and much more Companion volume to Galactic Astronomy, the definitive book on the phenomenology of galaxies and star clusters This book by Judith L. Cameron, Ph.D. is the continuation of her true story of her ongoing encounters with benevolent extraterrestrials and the education that she has received from them throughout her life. She began sharing her story in her first book, "Caught Between Two Worlds...A Journey Through Time. She had a lucid dream that told her that part of her life's work was to train to be an ambassador-a liaison between Earth humans and extraterrestrials when the star visitors come en masse on their first contact mission. Follow Judy's continuing adventure from being a child of six and meeting her first extraterrestrials to her present-day encounters which have occurred in many different ways. Judy talks about the remarkable things she has learned from these benevolent beings, disclosure, and the awakening of the masses. She will take you around the world sharing with you the stargates that are present and who is assumed to have built them. Traveling around the globe to exotic places such as Bora Bora, Orpheus Island, Australia on the Great Barrier Reef, Hawaii, the great American Southwest, Mecca, Saudi Arabia, Cairo, Egypt, and Dubai, United Arab Emirates, Judy's story will enchant and at times, captivate you. Working as a public-school teacher for forty years teaching all grade levels, and at NASA, the National Aeronautics and Space Administration as an educational consultant, along with her work as a doctor of clinical hypnotherapy, have given Judy the background and credibility that she needs to carry out her mission. Follow Judy now as you learn of the wonderful possibilities for our future Earth. "When I finished reading this book, all I could say was WOW! What a stunning piece of literary work... It is concise, brilliantly written, backed by scientific findings, with clear human logic and intelligence. If this doesn't awaken the masses to delve into who and what they truly are, I can't imagine what will."*

~ Jerry Issa, teacher of metaphysics, Trenton, Michigan This book will change your life if you let it. If we are accidental beings on a remote planet in a vast universe, existing for merely a blip in cosmic time, what's the point of living at all? Until we learn life is too significant to be a short-lived brilliance that rises out of nothing and ends in nothing, we will continue to live out our lives in, what Thoreau saw as, quiet desperation. We sense the materialistic wall when we ask the question, "Is that all there is?" Without resorting to miracles or magic, this book provides compelling evidence of life beyond the physical world by logically investigating the limitations of matter in the universe, by examining the gaps in scientific theories and by analyzing what the mystics already know about a spiritual existence. It takes a dedicated seeker with no preconceived ideas and no intent on arriving to see beyond the materialistic wall. This book is intended to expand your awareness of life here and hereafter, hopefully providing the spark that will start you on your own personal pilgrimage. The mystics tell us we will be guided to the next step along our spiritual path when we are ready. Are you ready? AWARENESS: The following might be the thoughts of those at different levels of awareness as they walk through a rose garden. I want - I wonder how much I could get for these roses. I believe - God created roses when He created the world and everything in it. I doubt - Roses evolved from wild flowering shrubs, but most garden varieties are hybrids. I seek - How could anything as beautiful as a rose happen purely by chance? I know - Roses, like all life on Earth, are physical manifestations of spirit. The First Galactic Dynasty, the ongoing saga of Jason Preston, Book Two of Three: Discovering New Worlds, is a continuation of The First Galactic Dynasty: Book One of Three. Jason, having vastly expanded the fortune he inherited, is determined to put that prosperity to use making sure he leaves the world a better place than he found it. He begins with his native country, the United States, which has become politically and corporately corrupted, but believing the only way to fix the present status is from the inside, playing the game by all the rules, good or bad, that the game demands. Working from a position of wealth and power generated by his discovery, invention and endeavors, his first move is to take over the entire banking industry, doing away with interest payments, and redistributing the wealth by reestablishing the middle class through substantial loans to industrious people and ultimately bringing back small businesses and family farms. Then, as Prince of his own island principality, he makes alliances with other nations, establishes more farms and businesses around the globe, and goes a long way toward uniting the entire world. All the while he knows that unity is going to be essential because he is one of a few who know the planet itself is in danger of an interstellar invasion from an alien fleet. Fortunately, being prepared, he shares his corps of engineers and inventors with trusted allies so that when the time comes, Planet Earth is prepared to defend itself. After pursuing the invader to a neighboring solar system already conquered by the invader, Jason, the Prince from Earth, discovers other worlds and new allies, and seeks commerce and cultural exchange. Ahead is the exploration and extended venture of discovering the rest of the Galaxy, a journey that takes them to the opposite end of the Milky Way. That leads to the final adventure that still lies ahead in The First Galactic Dynasty: Book Three of Three: The Journey Home. *Slow Comes the Dark is set in the galaxy some five hundred years after the Planet of the Orange-red Sun. Galactic evolution has continued. Half the galaxy has split off, becoming the Galactic Federation. Giant corporations have taken over control, enforcing their will on all major worlds. These corporate CEOs have god-like powers over populations, following a rigid hierarchy. The top CEOs on Corporate Prime run the galaxy, issuing orders to the mid-arm, mid-level CEOs of their corporations, who in turn issue orders to local world corporation CEOs. After five hundred years of corporation rule, these CEOs have become unethical, immoral, selfish, and follow greedy policies. Anything goes if it promotes corporate profit. When dealing with another corporation, plan for the worst and you'll be successful. On one of the outer rim worlds of the Abelard Sector, namely Scorpi-C, a resistance movement has formed to combat the unethical corporations. Called La Resistencia del Diablo, this group is secretly led by the local CEO, Alfonso Vega, of Galactic Dynamics Corporation, one of the three largest corporations in the galaxy. His organization has been gathering top-secret data for years. The remote rim world of Rho-C, Abelard Sector, originally settled by the powerful Galactic Electronics Corporation, is their bioengineering research station. Here, top corporation scientists develop very special bio agents. While they have developed some highly toxic chemicals, whose vapors killed within minutes of inhalation, that isn't their main line of research. Rather their focus is on biological and genetic engineering: the genetic mutation of existing species and the creation of completely new species, and yes, one of these species is homo sapiens. This research began because nearly two hundred years ago, GE Corporation men had uncovered a stash of the ancient genetic engineering samples and research notes. However, unknown to all, another man, called the Master, who possesses immense mental abilities to dominate others, is also at work. The Master's goal is the destruction of all corporations. He doesn't care how many people he harms, mutilates, or murders, as long as it forwards his goal. He has long ago taken over total control of Rho-C, a top-secret corporation research planet. As the story opens, the corporations have sent the entire 519th Infantry Division to Rho-C in an attempt to retake their secret base; the space war has begun. Concurrently, the Master executes a brazen attack on a giant space station in this rim sector from which the division launched their attack. Alfonso now has to fight not only the corporations and societal evolution but also the Master. Slowly, the overall*

situation spins out of control. Worse, the bio genetic agents are being used on humans once more. Even Alfonso becomes a victim, but he and his group are determined to fight back against overwhelming odds, aided by one ancient humanoid robot. Who are you? Really... Who are you? This workbook is an expository guide to facilitate multidimensional awareness. Are you a spiritual being having a human experience? Would you like to wake up the human to the spiritual experience? A point of perspective (introspection/perception) dances in the balance of the seer's vision. Have you suffered from the limited experiences and thinking of others? Is it possible that you might have galactic origins from elsewhere in the Milky Way? Many are awakening to the potential of galactic citizenry and/or spiritual connectedness beyond the notion of reincarnation. I can help you engage contact experiences and garner opportunities for developing your personal abilities and/or 'gifts.' This psychospiritual coursework is designed to bridge worlds, build relationships across dimensions and transform lives. What you may think you know about extraterrestrials, guardian angels and spiritual beings will be challenged as you explore the pages of this book. Points of view differ regarding our origins and the development of human beings through their 'dominion' on earth. What if there was more to the story that we haven't even explored yet because we've been too terrestrially focused in our 'outer' living environment? What is your natural state of being? Is there more? Would you like to find out? Clearing the cobwebs out of the soular mind begins with questioning the very foundation of one's belief system. It doesn't hurt at all and it does lead to deeper understanding. This path is not for the timid, but your courage will definitely be rewarded. This is a great companion *Zendor the Contrarian: A Seminal View of Consciousness, Cosmology and the Congruence of Science and Spirituality* - <https://www.createspace.com/4333292>. *Gotlieb* is a writer central to the Canadian science fiction canon. Though she has been called the queen of Canadian SF by Robert J. Sawyer, and though David Ketterer has suggested that she is Canadian SF, *Gotlieb* has been largely overlooked by SF studies. This book delves deeply into her body of work and traces her career in detail. Offering close readings of *Gotlieb's* novels, short stories (including ones not reprinted since their initial appearances), and SF-related poetry, this study explores *Gotlieb's* development as a writer and her characteristic themes. The book also references her manuscripts when the differences between them and the published stories provide insights into her working methods. The book enumerates and analyzes *Gotlieb's* innovative explorations of common SF tropes such as the superhuman, human-alien interaction, and the galactic empire, her prevalent thematic concerns (e.g., reproduction, colonization, the mind-body relationship, the essence of "humanity") as well as her stylistically dense and literary approach to the genre. A noted professor of physics and astronomy recalls the intellectual journey to understand the galaxy, and universe that contains it, in the twentieth century, looking at the unique features of the Milky Way, the technological advances that have allowed us to research it, and describing a black hole that exists at the very center of our galaxy. (Science & Mathematics) "The Golden Brat" Reinhard von Lohengramm, a military prodigy and admiral of the Galactic Empire, has ambitions beyond protecting the borders or even defeating the Empire's enemies. He seeks to overthrow the old order and become a truly absolute—yet benevolent—dictator. His rival, the humble Yang Wen-li of the Free Planets Alliance, wishes to preserve democracy even if he must sacrifice his political ideals to defeat the Empire. Their political and military battles play out over a galactic chessboard in an epic saga fifteen centuries in the making! *The Greatest Thing we can ever possess in this life ...The Greatest Joy we ever may retain*

*in this life ...The Most Wonderful attainment all Created mortals may yet ever know in their lifetime ... is; To LOVE GOD! With all our heart; with all our soul and with all our might ...Irrespective of the vast myriads of belief systems, the most important Truth in all existence and in subsistence is The Pure All Absorbing Love of God. Irrespective of the human nomenclature assigned to This Incomprehensibly Pure Love of God; he who indeed Loves The One TRUE God Whom he undoubtedly regards as THE SUPREME HIGHEST; he is he who knows that human tongues, languages and relational differences can never amount into a force strong enough to erode That same Pure Love For God Planted inside his heart by The God he regards as THE SUPREME HIGHEST. Whatever nomenclature any mortal may have assigned to be That Pure Love of God - to any indivisible or divisible fragments, if any man claims to have This same Pure Love for God; such a man in Totality can never ever deny The Truth that in Jesus The Christ alone resides The Grand Summation of All The Representations of all God's Love. Amazingly, the human nomenclature any set of people may have assigned to their Love For God may be different from that which another set may have assigned. If therefore language, tribe, race or just about anything of human affiliations and origins stand as a dividing difference between humans who claim to have That same Incomprehensibly Pure Love for God; it then becomes questionable whether That Love they claim to have for God was Genuine and homogenous or not. If a man says he Loves God but for whatever reasons known to him, acknowledges not The Last Avatar Whom The God he claims to Love has sent; then it becomes obvious that such a man willfully chooses to understand his Love for God in ways which he freely desires and not in the Simple way which has been revealed unto him. How then would he cope when That Love of God Decisively Judges the free wills of all humans? Just when space-wrecked Alan Corinth has fully adjusted to life on his new planet, a pair of gorgeous twin girls suddenly appear in front of him, delivering news that shocks him to his core! Meanwhile, though Cleria is secretly falling for Alan, when a rival for his position at her side appears, she's forced to recall her dire circum-stances. Later, once Alan knows that the fate of the whole planet Ares is on the line, he makes a bold decision for the sake of this planet and its people. Find out what's in store for them all in this third volume of Captain Corinth: A Galactic Navy Officer Becomes an Adventurer! Alan Corinth, the only survivor of an attack on his galactic navy vessel, crashes down onto an unknown planet. There he meets a girl named Cleria with an unclear past, and learns that a mysterious power that everyone calls "magic" exists in this world. To understand the everyday workings of his new home planet, Alan sets out with Cleria to meet more people in the towns and villages along their path. Will he be able to survive and forge a new life in this world of swords and magic with the power of science and technology on his side? Watch as Alan's adventures continue to unfold in volume 2 of Captain Corinth: A Galactic Navy Officer Becomes an Adventurer! This is both a remarkable journey through sacred India, and a pilgrimage to the immortal self. With his ever inexorable determination to pursue his highest path, Jack Haas visits many holy areas within the subcontinent of India, and communes with numerous masters who have passed from this plane, but who remain in the subtle realm to assist mankind in its growth towards freedom and eternity. These include Krishna, Guru Nanak, Ramana Maharishi, and Shiva himself. Within the pages of this book Haas describes his own evolution towards an expanded, unlimited consciousness as well as his unique relationships with many aspects of the divine feminine, including Mother Mary, Sophia, Parvati, Gauri, Kali, Saraswati, Durga, and Gaia. Haas' path*

*eventually leads him to the absolute union of spirit and flesh, and to the inextinguishable Tao running through all of life. The story is true in its setting and period in history. Some of the names are fictional, but the events, dates and places are documented through family archives consisting of an 1876 family Bible, letters, and numerous pictures dating back to 1850. In this book, the author describes the trials and tribulations of a slave family struggling to stay together through the most difficult times in America. The story is written for all ages with a focus on the daily struggle of a slave family seeking to be free.*
